

Alternative Hardware Explained:

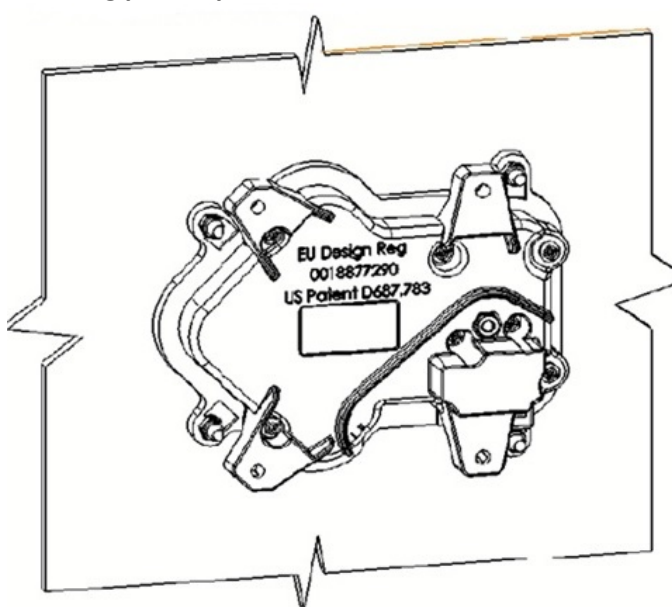

The 'original' AudioNav includes two sets of fixing bosses.

The diagrams below show the rear view of the 'original' AudioNav installed using option A and option B.

Fixing points, position A

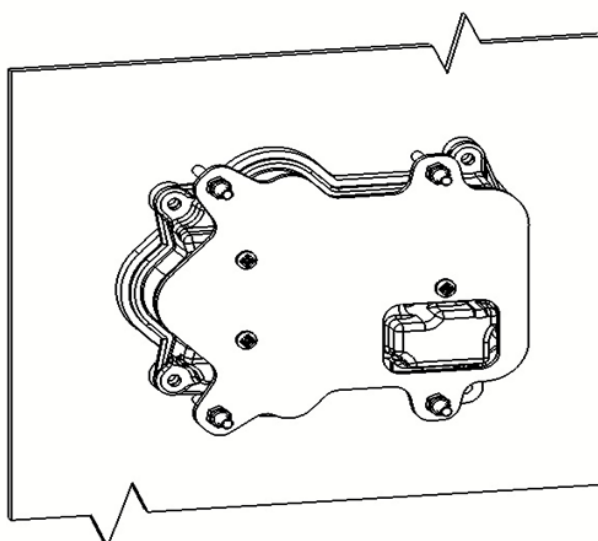

Fixing points, position B

Rear view showing the alternative hardware version of the AudioNav

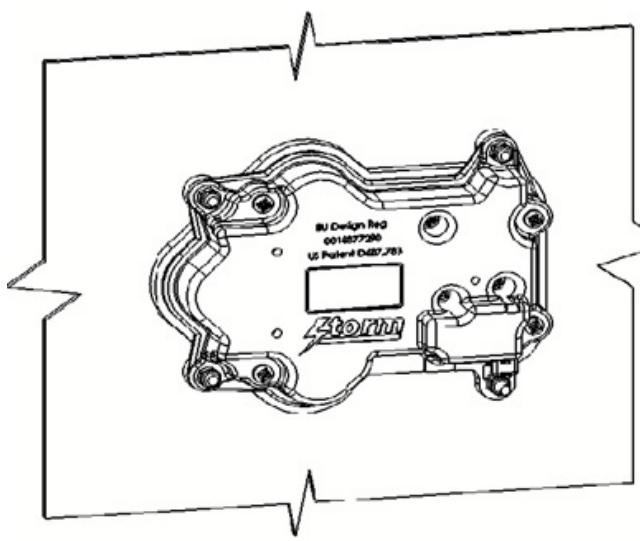

Fixing points, position A – rear plate required

The plate is supplied free of charge on request

Fixing points, position B – no change required

Fixing Position B still requires M3 x 12 mm studs.

Note that the bosses are now 7mm thick
(was 4mm previously)

On the alternative hardware version the cable tie is supplied fitted
