# Legend Tile Library – Graphic & 720 Keypads

Available Legend and Colour Tiles for Graphic Series and 720 Series relegendable keypads are shown below. Each sheet has 30 tiles. All legend tiles are black print on transparent background. Colour tiles are suitable for either backlit or standard product when used in conjunction with a legend tile. Fonts and character size may differ from those shown.

Set A

Set B

Set C

Set D

Set E

Set F

GFX keypads are supplied with the key bases fitted.

Each key position can be customised without dismantling the keypad.

Keytop legend options can be selected from a library of standard symbols, characters or background colours.
Alternatively, customised keytop graphics can be created using laser printed acetate film or screen printed polymer film. The total thickness of the coloured tile and legend tile should not exceed 0.4mm. (Please note, paper is not recommended as the printed graphics may degrade if exposed to moisture / condensation.)

1 Orientate the keypad correctly by checking the connector position on the underside of the keypad.

2 Load each key position in turn. First locate the legend tile into the transparent key cap, then locate the coloured tile (see diagram).

Before snapping the transparent key cap, including legend and customer tile, into position ensure that the legend tile's position, orientation and alignment are correct.

Please note, if it is necessary to remove the transparent key cap a suitable tool or pliers should be used. Once removed the key cap should not be re-used; spare key caps and bases are available in sets of 4, part number GS0000.

4 Way Keypad
