

The Storm difference

Assistive technology
designed with the
users in mind

Storm
Interface

It takes accessibility experts to design fully inclusive technology

With 30 years of experience and worldwide presence, Storm's Assistive Technology products and services are designed in the UK by a team of accessibility experts and exceed accessibility and quality standards to offer the most advanced integrated solution currently available on the market.

All Storm's products are built to last and undergo strict quality and resistance checks. We are committed to offering the most accessible self-service experience by ensuring seamless usability, intuitive design, and reliable support at every step.

Why choose Storm Interface?

Specifically designed for kiosks and self-service installations

Designed and built in the UK to the highest quality standards

Extensively field-tested to offer the best user experience

Sturdy and resilient design - Impact resistant 5J rating (EN62262)

Weatherproof - IP-65 weather resistant

Ergonomic design for ease of use

Full EAA, ADA and Korean standards compliance

RNIB

Tried and
Tested
